Physical Examination :

Pulse – 76.

Temperature – Normal

Mouth – Yellow tongue.

Liver – Normal .

Lungs and Heart – Normal .

Abdomen – Tender.

Last Treatment :

Allopathic treatment till case taking.

Analysis of the Case :

The case was mainly syco-psoric. For antidoting the allopathic medicine Nux Vomica was administered first.

Treatment :

11.05.1997 .

Nux Vomica – LM/2.

One medicated globules No. 10 mixed in 60ml of distilled water. Add 15-20 drops of alcohol for preservation. The phial divided into 8 equal doses. After 10 succussions, one dose was mixed in 3/4th glass of water. One teaspoon solution applied in the after taking food. Three doses daily.

Advised to report after two days.

13.05.1997 .

Pain persists but less acidity. Sour smell from stool. The aversion and disorder in milk indicated me to prescribe Aethusa Cynapium .

Aethusa Cynapium – LM/2. Mood of preparation and administration was same. Two doses daily.

19.05.1997.

Improvement follows.

Aethusa Cynapium – LM/3. 60 ml, 8 doses. One dose daily.

24.05.1997 .

Medicinal effect was good. Yesterday pain started due to irregularities of diet. Stool and urine normal. Sour smell of stool still present. Less of appetite in the evening.

Aethusa Cynapium – LM/4. 60 ml, 8 doses. One dose daily.

08.06.1997 .

Improved in all respect. Pinching pain in the evening. Stool and urine normal.

Aethusa Cynapium – LM/5. 60 ml, 8 doses. One dose daily.

20.06.1997 .

More improved. No pain in chest, slightly present in back region. Stool 2-3 times, not clear. Mentally improved.

Aethusa Cynapium – LM/6. 60 ml, 8 doses. One dose daily.

27.06.1997 .

Well. Milk was tolerated. Stool normal. Miasmatic indication was Thuja Occidentalis.

Thuja Occidentalis – LM/3. 8 doses in 60 ml of D.W. One dose daily in the morning.

25.07.1997 .

Normal in all side. Slight pain was feeling in back region since last 6-7 days.

Thuja Occidentalis – LM/4.. 8 doses each in 60 ml vial. One dose daily morning.

Reported after three months that he was absolutely fit.
