

Impotency :: Male Impotency

- Dr. Srikanta Choudhury

Impotency, as it stands in Oxford , "unable to have full sex or reach an orgasm". The very long general belief among the common mass is not the proper term, as there is a candid difference between impotent and infertile. However, the perpetual impotency or a long duration leads to infertility, which is a known fact. The case under review here is a pure case of impotency, which is cured by the use of LM Potency.

"Dr. Choudhury, help me! Help me from the disaster!"- A young man of 28years enters my clinic at a summer morning. The young man looks gentle. He possesses a medium-built structure with fairly wheatish complexion. He looks perplexed and anxious. His head was bending down to the table, eyes lowered. He seems bit shaky too, may be because of the very nature of the case.

As I gave a patient hearing, after a small pause, his eyes lift up to me. He appeals, "I have tied my nupital only a month back. Help me Doctor, or she might leave me for ever!"

Now, it was my turn to speak out. "Tell me young man, let me know your problem. Tell me everything, what ever you want to say".

The young man, Mr. Sarkar is a businessman, by profession. What he revealed on that morning of 25th May 2003 is that he is in a great trouble of satisfying his spouse during conjugal meet. He has been feeling the mental urge but that did not fully reflect on this sex organ. "That do not erect to its full. With great mental effort, I had finished my course in number of occasions. I feel that she is really co-operating. I feel she remains unsatisfied at the end of affair, although, she never expressed that. Doctor, I feel guilty! If this continues, she might disappear from my life or leave me alone. Save me Doctor." He added, his spouse had even consoled him that he can overcome the problem, but he feels he should consult a doctor. He drops at my clinic.

For ascertain totality, collected symptoms as below:

Main Problem

Male organ does not erect fully during excitement, which he had not noticed before marriage.

Other Complain

1. Itching in the side of groin, sometimes severe when change the dresses after return home.

2. Flatulence, Erectation if taken rich diet.

Past History

History of masturbation. He had no sexual relation with anybody before his marriage. Only poor digestion, flatulence and acidity. He had no other severe illness recorded in the past as he remembers.

Personal History

Appetite - Normal .

Desire - Lukewarm food, fish, sweet.

Aversion - Rich food, milk that causes indigestion, aggravate flatulence.

Bowel - Not satisfied. Need 20 to 25 minutes. Constipation.

Sleep - Habituated late riser as he goes to bed at later part of night. No deep sleep, slight sound disturbed the sleep.

Perspiration - Normal .

Thermal relation - Prefers winter season.

Bath - Likes. Need hot water in winter.

Habit - Smoking but not to alcohol, tea.

Mental Symptoms:

Forgetful. Intellect. Slight cause makes him irritated. Idleness.

Family History:

No such report was given.

On Physical Examination:

B. P . - 110 / 70,

Pulse - 76.

Treatment:

Present complaint indicate Caladium Seguinum, because,

1. No erection during excitement.

25.05.03

Caladium Seguinum - LM/1, LM/2.

One medicated globules No.10 mixed in 60ml of distilled water. Added 10-12 drops of alcohol for preservation of the doses. Each phial divided into 8 equal doses. After 10 succussions two dose to be taken in the empty stomach daily morning and evening. After finishing the 1st medicine then will start 2nd one.

Ask for report after 10 days.

06.06.03

He returns to report that from the next very of taking the medicine, he felt better during conjugal meeting. Within a few days, he felt, the problem was gradually reducing. Now almost normal. He was suffering from abdominal disorder due to irregular lunch timing during the day in between and attended the relative's invitation. Also, could sleepless as both were spending newly coupling life.

Nux Vomica - LM/1, LM/2.

Prepare the doses as above stated procedure. Two doses daily for two days, then one dose daily.

Mr. Sarker spends the last week of June for Honey-moon. The couple spends the week in 'heavenly mood' and visited me again to thank. I had to advice him to collect another course of medicine later because the case is syphilitic and Psoric combination. He needs anti-miasmatic remedies.

Conclusion:

It is miraculous that the homoeopathy medicine acts much better, even in the days of Viagra. However, the LM potency acted even better.

Samuel Hahnemann had introduced this posology in his 6th edition of the Organon. This is the latest scientific contribution of our great teacher.

The advantages of LM potency over centesimal are :-

1. With LM potency the course of treatment can be minimized to half, quarter or even more less.
2. Highest development of power. The indwelling essence developed its full extent.
3. 'Ideal of cure' only can materialize with this potency.

4. Frequent repetition is permissible even long lasting remedies, by which the remnants of symptoms will be disappears.

5. Mildest reaction. Can be safely administered even in most fatal cases.

6. It required no antidotes.

These are the superiority of LM potency. If we follow the directives of Our Master we will achieve our goal without any problem.
